		(1.6%)	(11.5%)	(43.0%)	(43.6%)	(0.3%)	(0.1%)	(41.6%)	(58.4%)	(91.6%)

\* Local government epidemiological investigations are in progress and may change depending on the results of epidemiological investigations.

-All of the new cases yesterday came from overseas, and there were no confirmed cases in the community for the first time since the outbreak on February 18th.

The Central Defense Response Headquarters plans to conduct a serological analysis for the purpose of establishing effective quarantine measures confirming the COVID-19 community infection trend and collective immunity.

It is also under consideration to use blood secured through the National Health and Nutrition Survey, which can represent the whole country, to conduct antibody tests with priority in infectious disease special management areas.

The Central Defense Response Headquarters called for special attention as it is expected that outdoor activities such as travel will increase during the holiday season.

If you have fever or respiratory symptoms, it is advisable not to travel, use your own vehicle as a minimum family unit, and avoid crowded public destinations.

It is recommended to wash your hands frequently while traveling, cover your mouth and nose with your sleeves when coughing, keep 2m between people, and wear a mask when using indoor multi-use facilities.

If you have fever or respiratory symptoms after travel, do not go out and take a break at home. If the fever persists or symptoms become severe, contact the call center (☎1339, ☎area code +120) or the local public health center or visit a screening clinic first I asked for an examination.

14 days have passed since the general election on the 15th of April, but as there have been no confirmed cases related to the general election, it is possible to live a safe daily life if the quarantine rules are strictly followed, and he once again requested that attention be paid to the Corona 19 even during the holiday season.

This press release is intended to promptly and transparently disclose information on related occurrences, and is informed that it may be revised or supplemented according to the results of additional epidemiological investigations.
